VRFID Rev 5.24 Firmware Update Tech Note

**CAUTION: CAREFULLY READ INSTRUCTIONS BEFORE PROCEEDING.
NOT LEGAL FOR USE OR SALE ON POLLUTION CONTROLLED VEHICLES.**

FIRMWARE REVISION HISTORY

Rev 5.24 firmware updates Twin Tec VRFID units with the following new feature:

- Fixed bug that caused improper deceleration enrichment under some conditions.

UPDATE PROCEDURE

1. Update the PC Link VRFID software on your PC to version 4.0 or higher. You can download the software and accompanying instructions from our website. **Do not use older versions of the software after the VRFID update.**
2. Use PC Link VRFID and download your current setup data from the VRFID. Save your setup data to disk. **All data in the VRFID is lost during update.**
3. Update the VRFID firmware using Mega Boot Programmer software and the VRFID Rev 5.24 firmware files (refer to the Mega Boot Programmer instructions and firmware readme file). You can download Mega Boot Programmer and the VRFID Rev 5.24 firmware from our website.
4. Use PC Link VRFID to upload your saved setup data to the VRFID unit.

WARNING: Do not use with single sensor VRFI. Only for use with VRFID with WEGO IID dual sensor system.
